

## Medical: Writing medical case reports; Step by Step

### Description:

Case reports are professional narratives that give feedback on clinical practice guidelines and offer a framework for early signals of effectiveness, adverse events, and cost. They can be shared for medical, scientific, or educational purposes.

### Target Audience:

Medical Students  
Interns  
Residents  
Fellows

### Objectives:

By the end of this workshop, the attendees will:

- Understand the importance of reporting rare cases
- Learn how to write an attractive title and well-structured abstract
- Discuss examples
- Apply scientific writing in an example case
- Format and edit the writing based on scientific methods
- Choose the proper journal and follow the author's instructions
